(54) Title: COATING COMPOSITIONS CONTAINING LEVELLING AGENTS PREPARED BY NITROXYL MEDIATED  
POLYMERISATION

(57) Abstract: The present invention relates to coating compositions containing a polymeric or copolymeric levelling agent, which  
has been prepared by nitroxyl - mediated polymerisation. Further aspects are a process for the preparation of smooth surface coatings  
and the use of said polymer or copolymer as levelling agent in coating compositions. Yet another aspect are specific ethylenically  
unsaturated monomer compositions from which copolymers can be obtained by atom transfer radical polymerisation or nitroxyl  
mediated polymerisation, which copolymers are useful as levelling agents in coating compositions. Still another aspect is the use of  
poly-tert.-butyl acrylate or poly-tert.butylmethacrylate as a levelling agent in powder coating compositions.

## \* Special categories of cited documents :

\*A\* document defining the general state of the art which is not considered to be of particular relevance

\*E\* earlier document but published on or after the international filing date

\*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

\*O\* document referring to an oral disclosure, use, exhibition or other means

\*P\* document published prior to the international filing date but later than the priority date claimed

\*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

\*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

\*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

\*G\* document member of the same patent family
